EV CHARGING
SOLUTIONS FOR
SUSTAINABLE
FUTURE

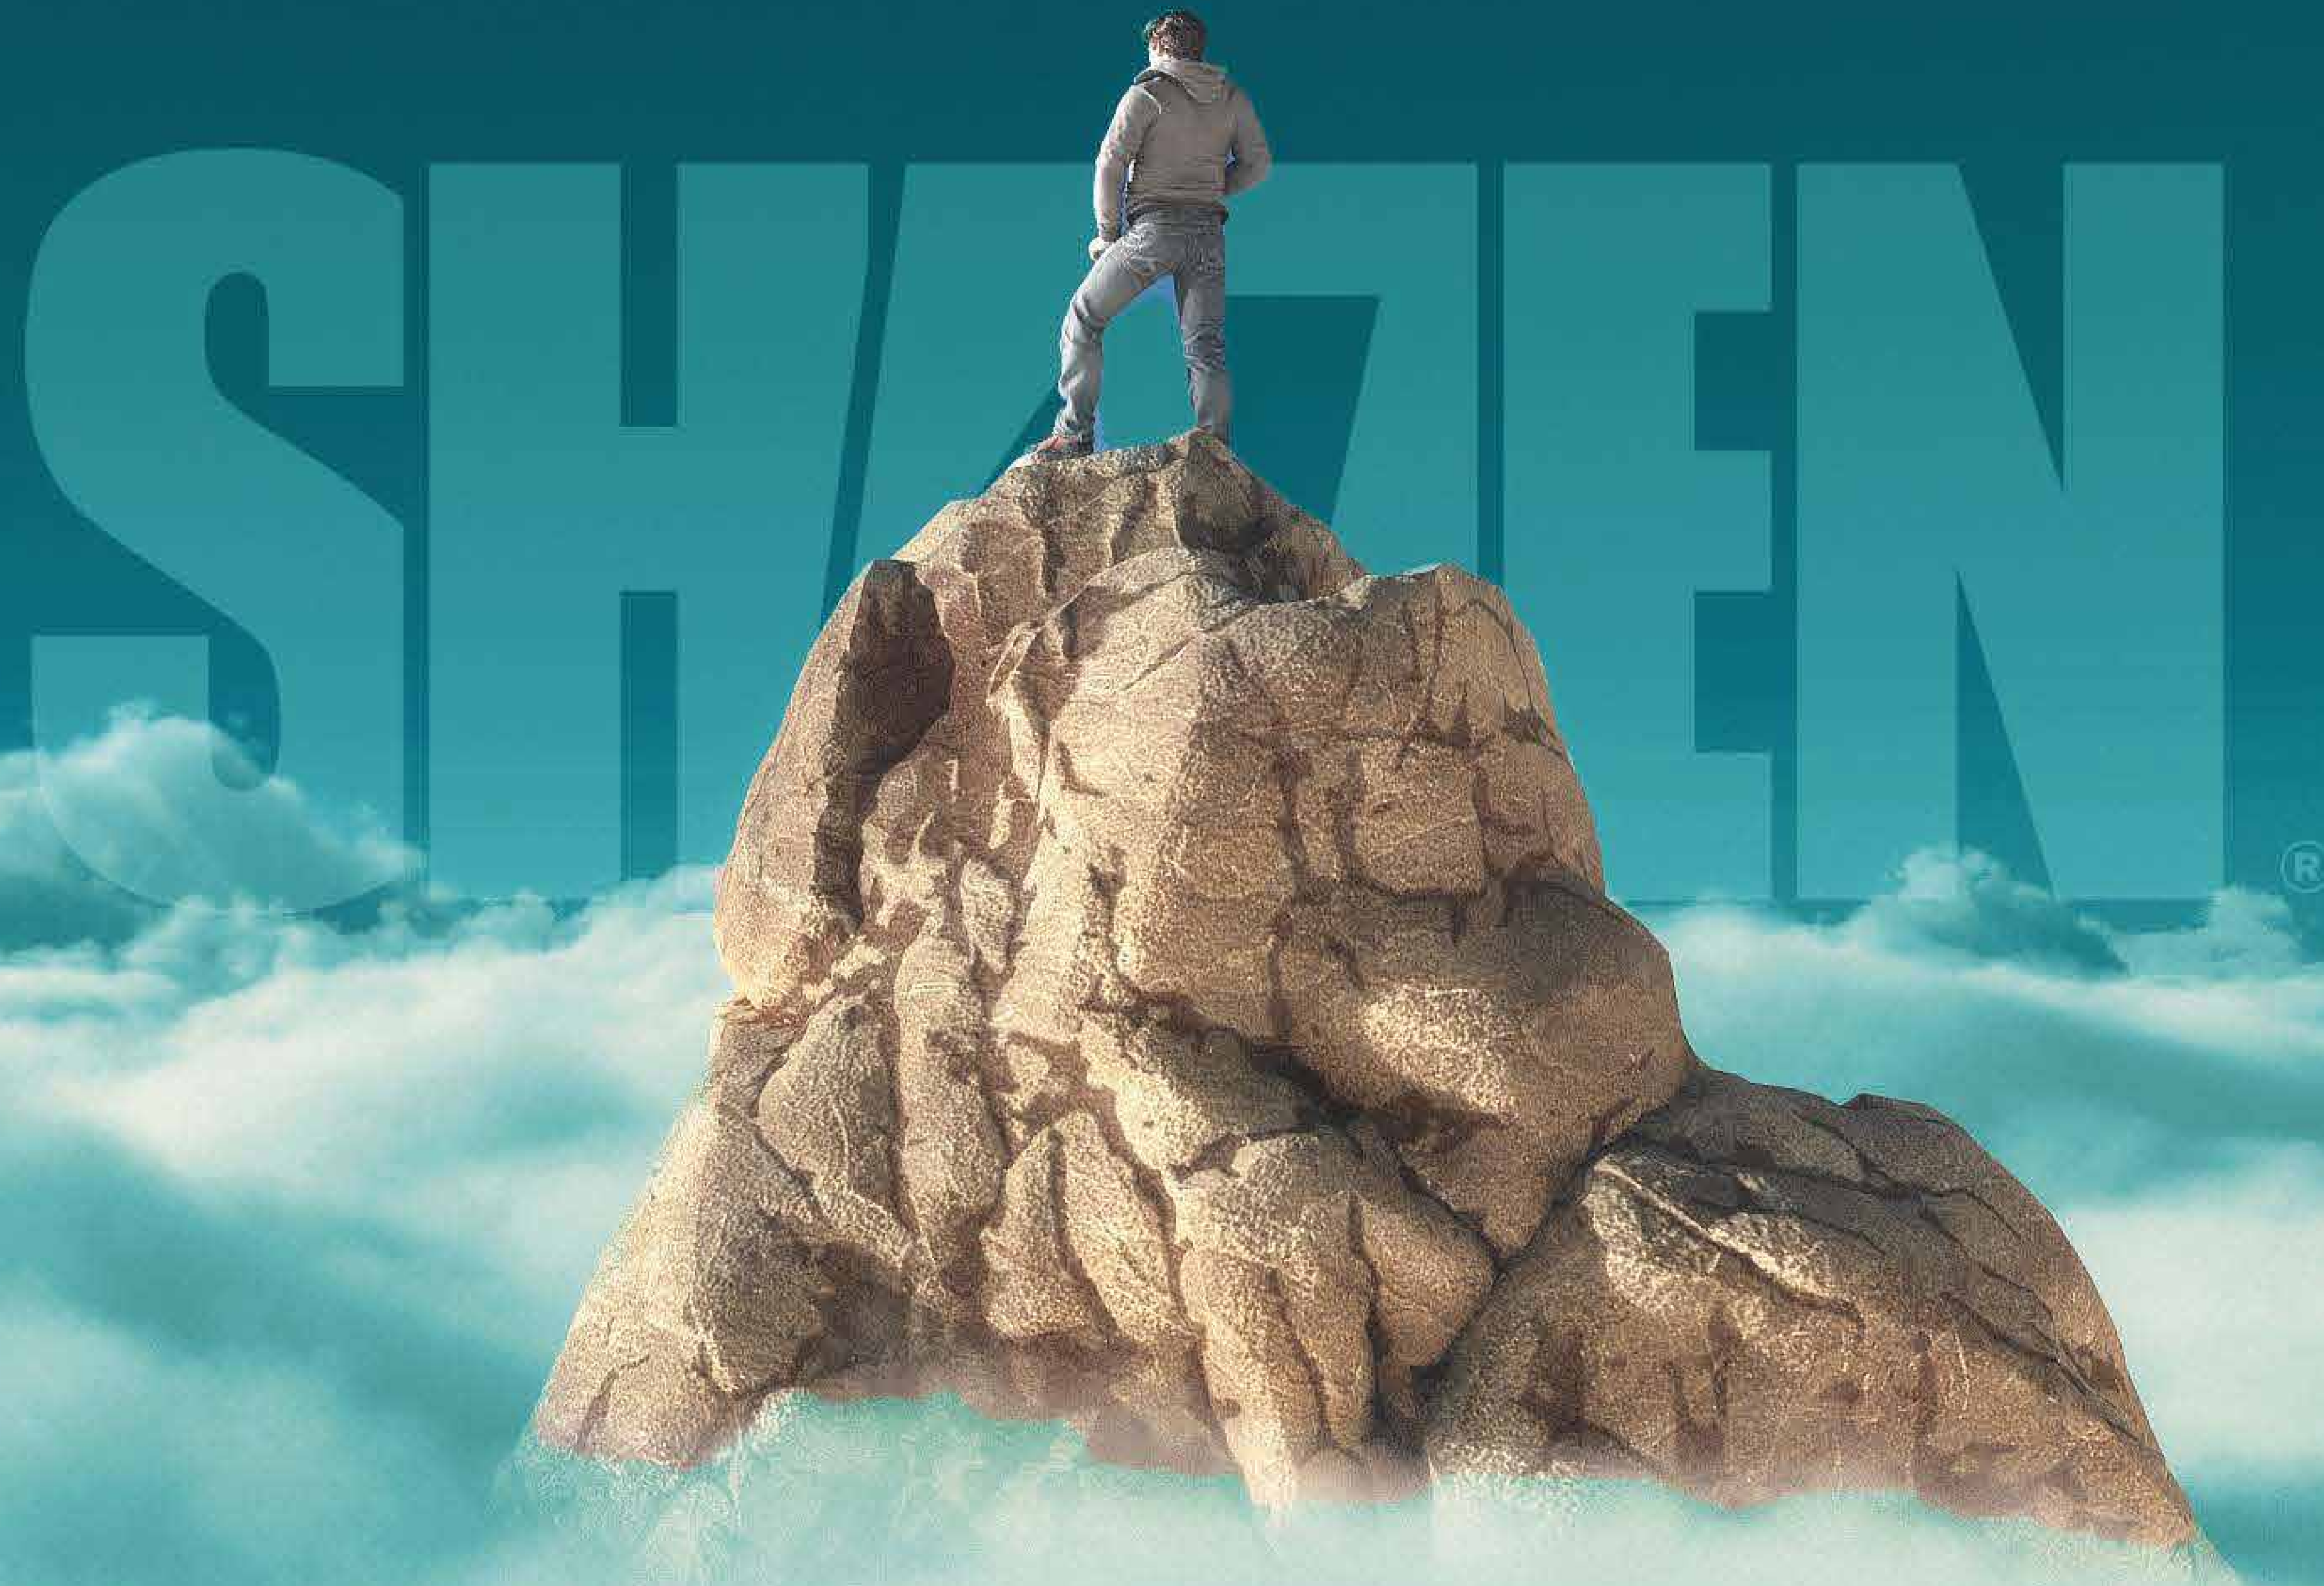

ELECTRIC VEHICLES: THE REVOLUTION IS FINALLY HERE

Electro mobility is growing fast across the continent as the real new technology for sustainable transportation and it is expected that the trend will accelerate exponentially. The technology transformation of the transportation sector with the widespread rollout of smart electric vehicles, including cars, trucks, trains, buses and even airplanes are poised to change how we drive, how we commute, how we power-up, and how we repair. These new vehicles will trigger large infrastructure changes required to support them.

TAKING THE LEAD

Over 40 years, MB engineering has added expert sophistication to the Egyptian electrical industry, which forged it a remarkable place in the Egyptian market as the leading supplier and manufacturer of electrical industries. This legacy and knowledge culminated in the efforts to accelerate the shift to sustainable mobility by launching its subsidiary for charging solutions “sha7en”.

DRIVING ELECTRO MOBILITY REVOLUTION

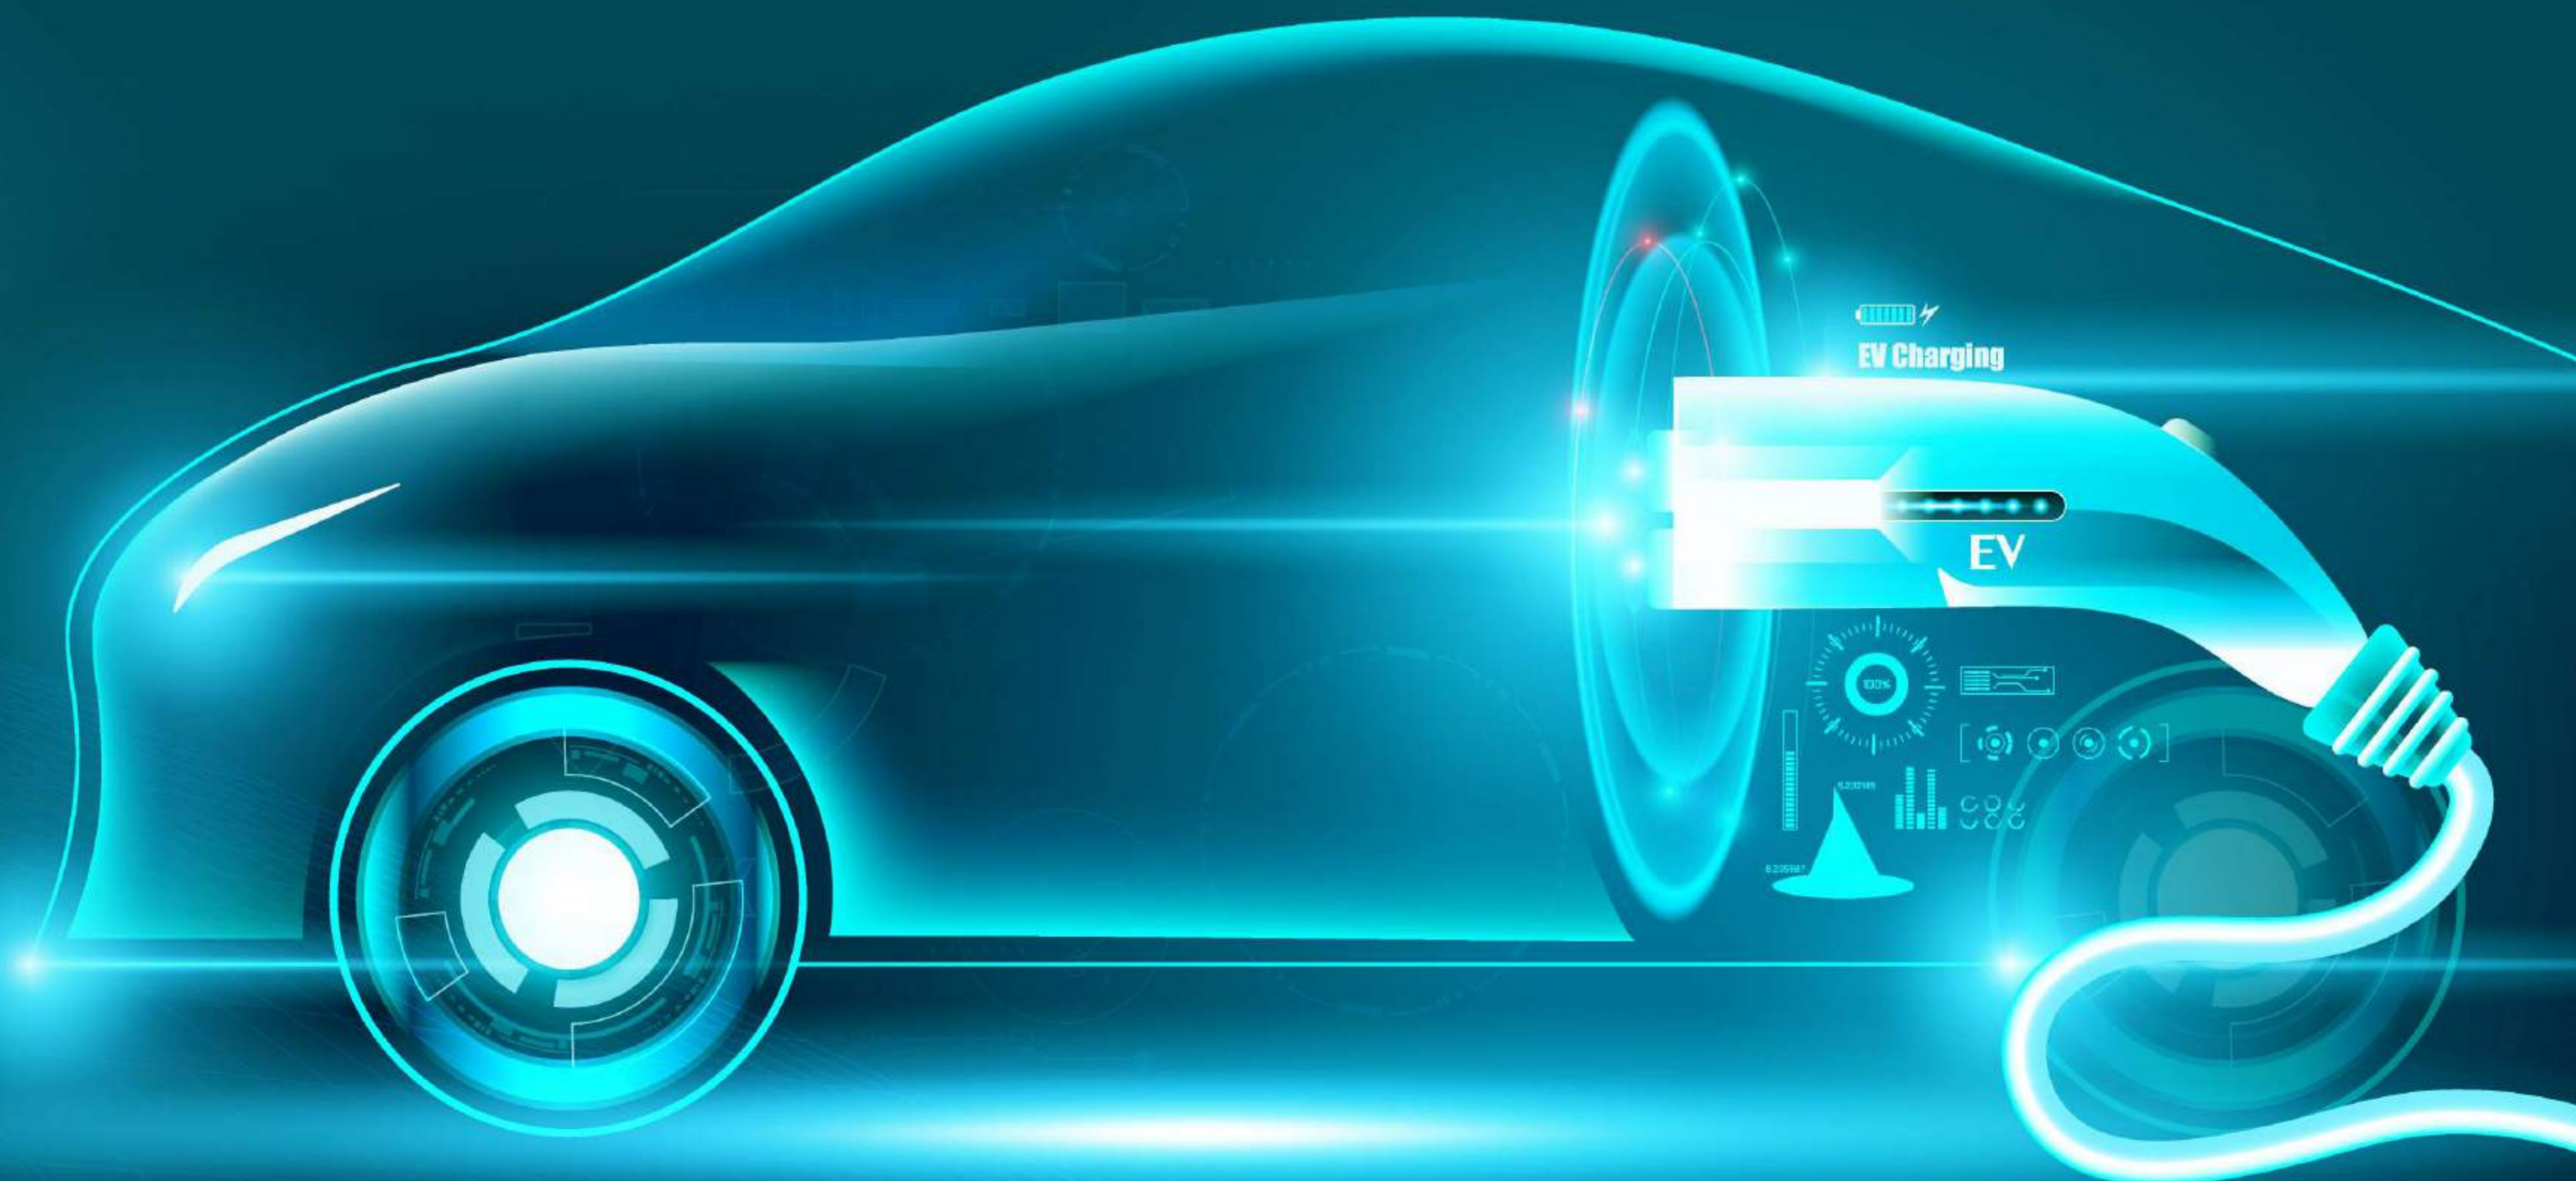

Sha7en offers comprehensive innovative charging solutions to facilitate the adoption of electro mobility and ease the transition to a sustainable future.

With Robust network of public charging stations, sha7en continues to develop the charging infrastructure required to meet the growing needs of EV drivers wherever they go by ensuring a simple and convenient charging experience.

Sha7en enables partners & charging station owners with expertise, scalable infrastructure, innovative software solutions, and services to enter the EV charging market and utilize new business models.

With its advanced charging products and services, businesses rely on Sha7en to install charging solutions for home, commercial, workplace & hospitality as well as fleet management.

Sha7en is accelerating positive change and transformation towards climate change with clean technologies in the mobility and energy sector.

EV Public Network

Innovative charging Solutions

Turnkey charging projects

YOUR RELIABLE MOBILITY PARTNER

Sha7en aims to expand its solutions locally and regionally to empower business, and individuals in their transition to electric as a reliable trustworthy partner with professional responsive charging services & products creating sustainable customer value.

PUBLIC EV CHARGING NETWORK OPERATOR

RELIABILITY. AVAILABILITY. ACCESSIBILITY

OUR NETWORK SOLUTIONS CREATE NEW VALUE AND OPPORTUNITIES IN E-MOBILITY BUSINESS.

FOR EV DRIVERS

Sha7en provides convenient & safe EV charging stations through its reliable network that delivers fast charging to everyone everywhere allowing more flexible charging opportunities.

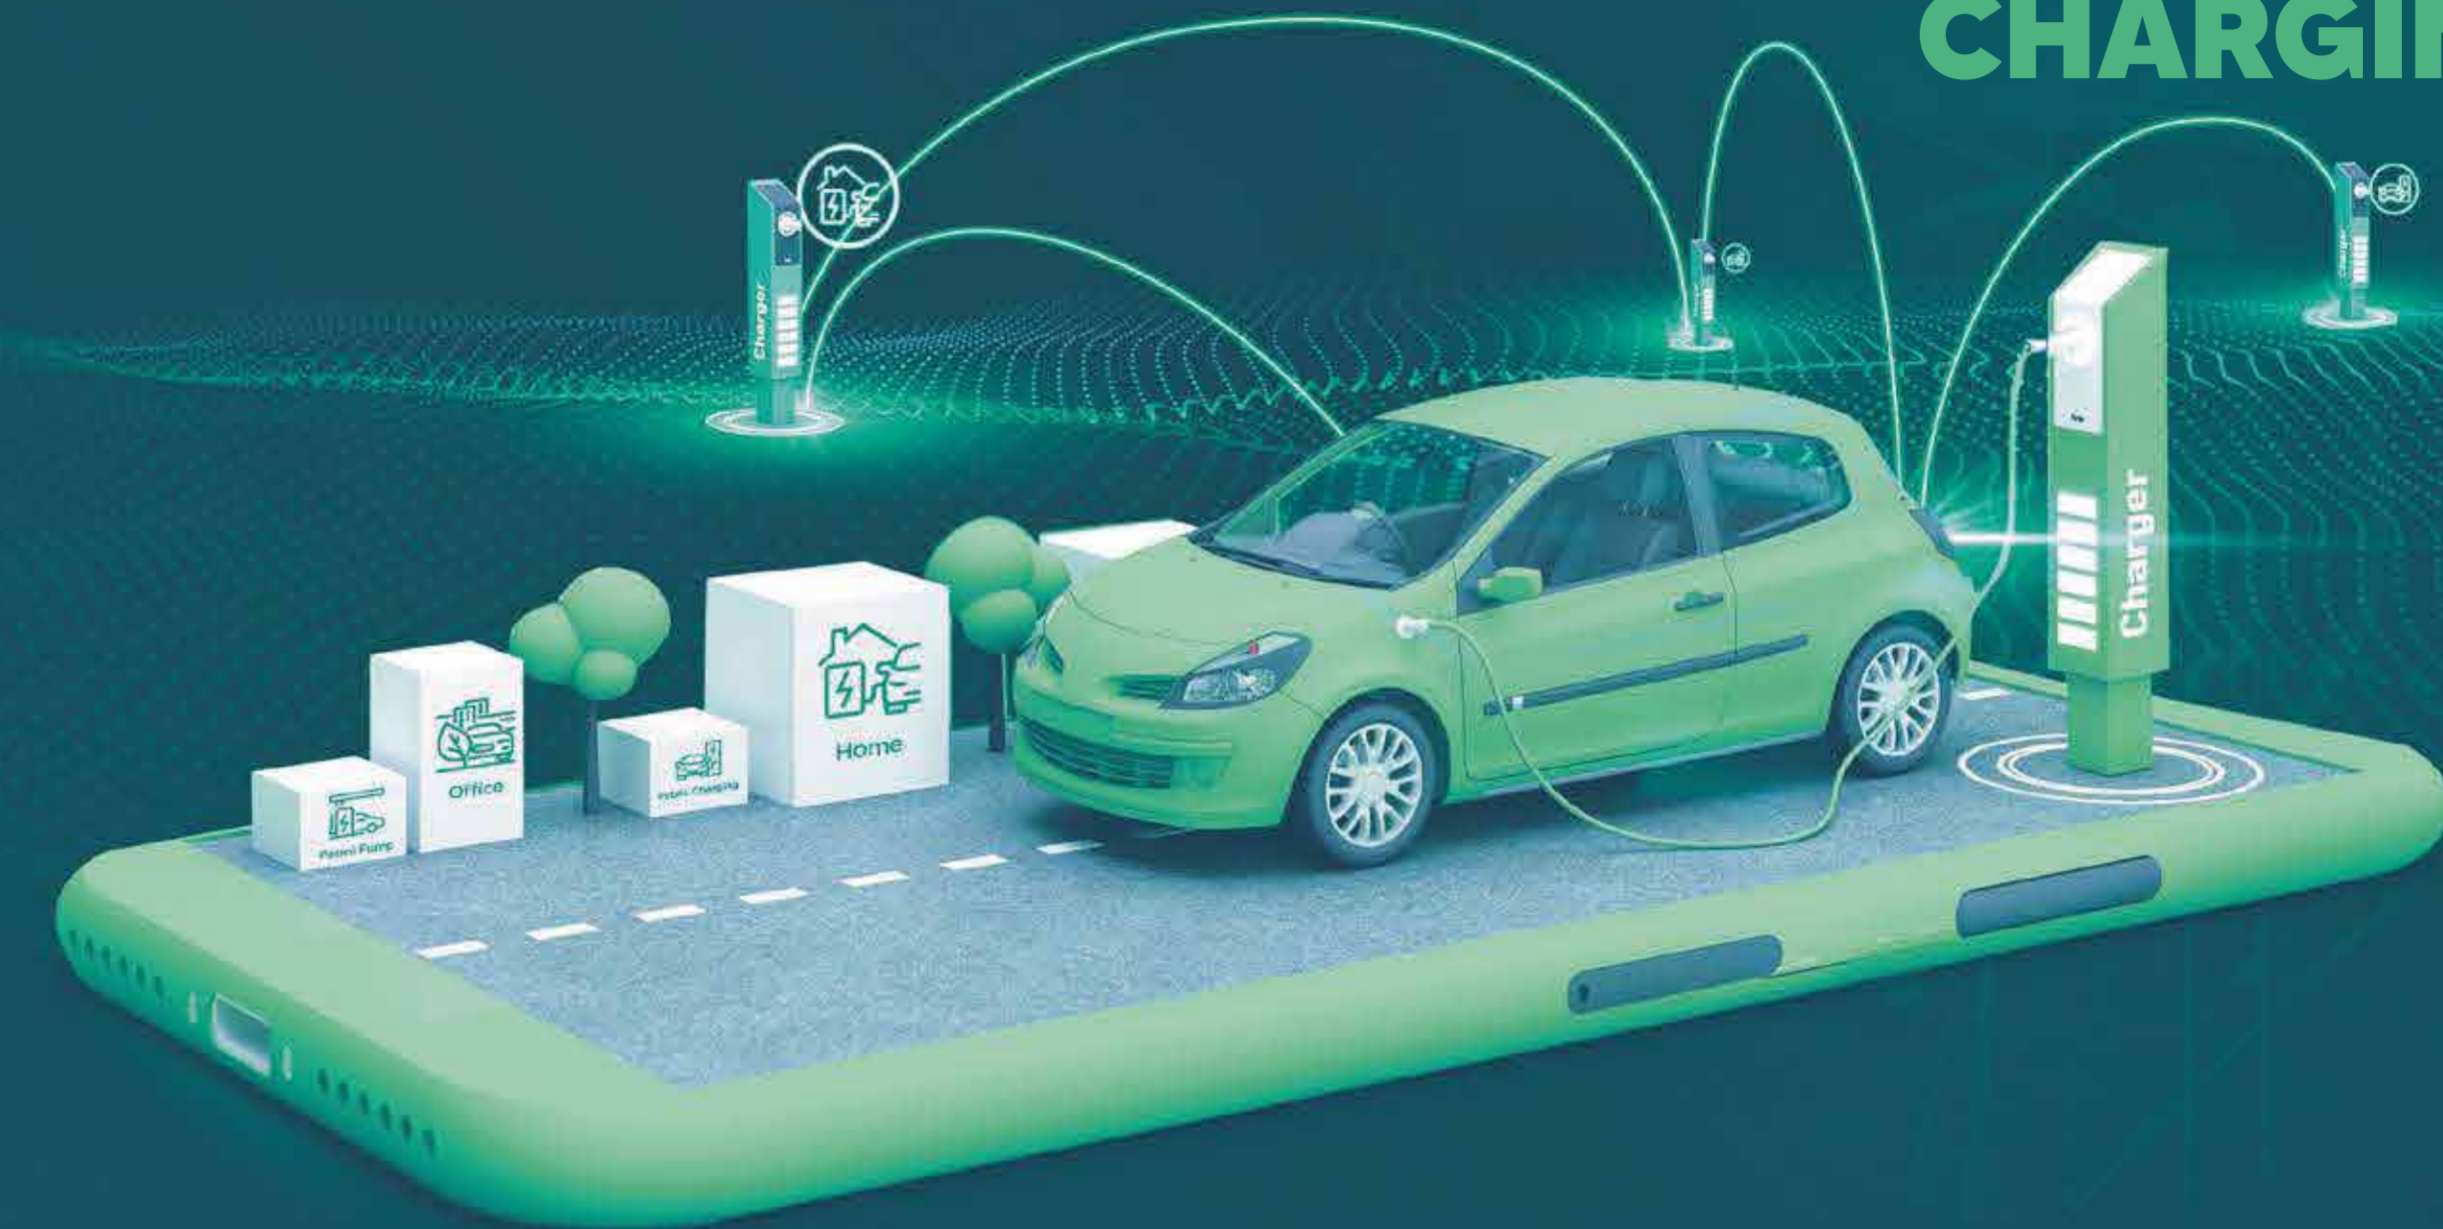

EV DRIVER SUPPORT

For premium charging experience, Sha7en offers user friendly mobile application that helps EV drivers to locate their charging station and establish driving routes that match their needs. EV drivers are able to securely pay for charging services via the application.

Specialized technical support team is available 24/7 to solve any customer issues at the charge point.

POWERING OUR SUSTAINABLE FUTURE

ROBUST EV CHARGING NETWORK

SMART MOB. APPLICATION FOR EV DRIVERS

FOR OPERATORS

As number of electric vehicles (EVs) on roads grow, so does the demand on the nationwide network of EV charging infrastructure at public places such as malls, outing spots, commercial centers and hospitality sector.

This presents an opportunity for such places to provide charging facility and attract more customers. In addition to that, extra revenue streams can be generated through utilization of charging station creative features and capabilities.

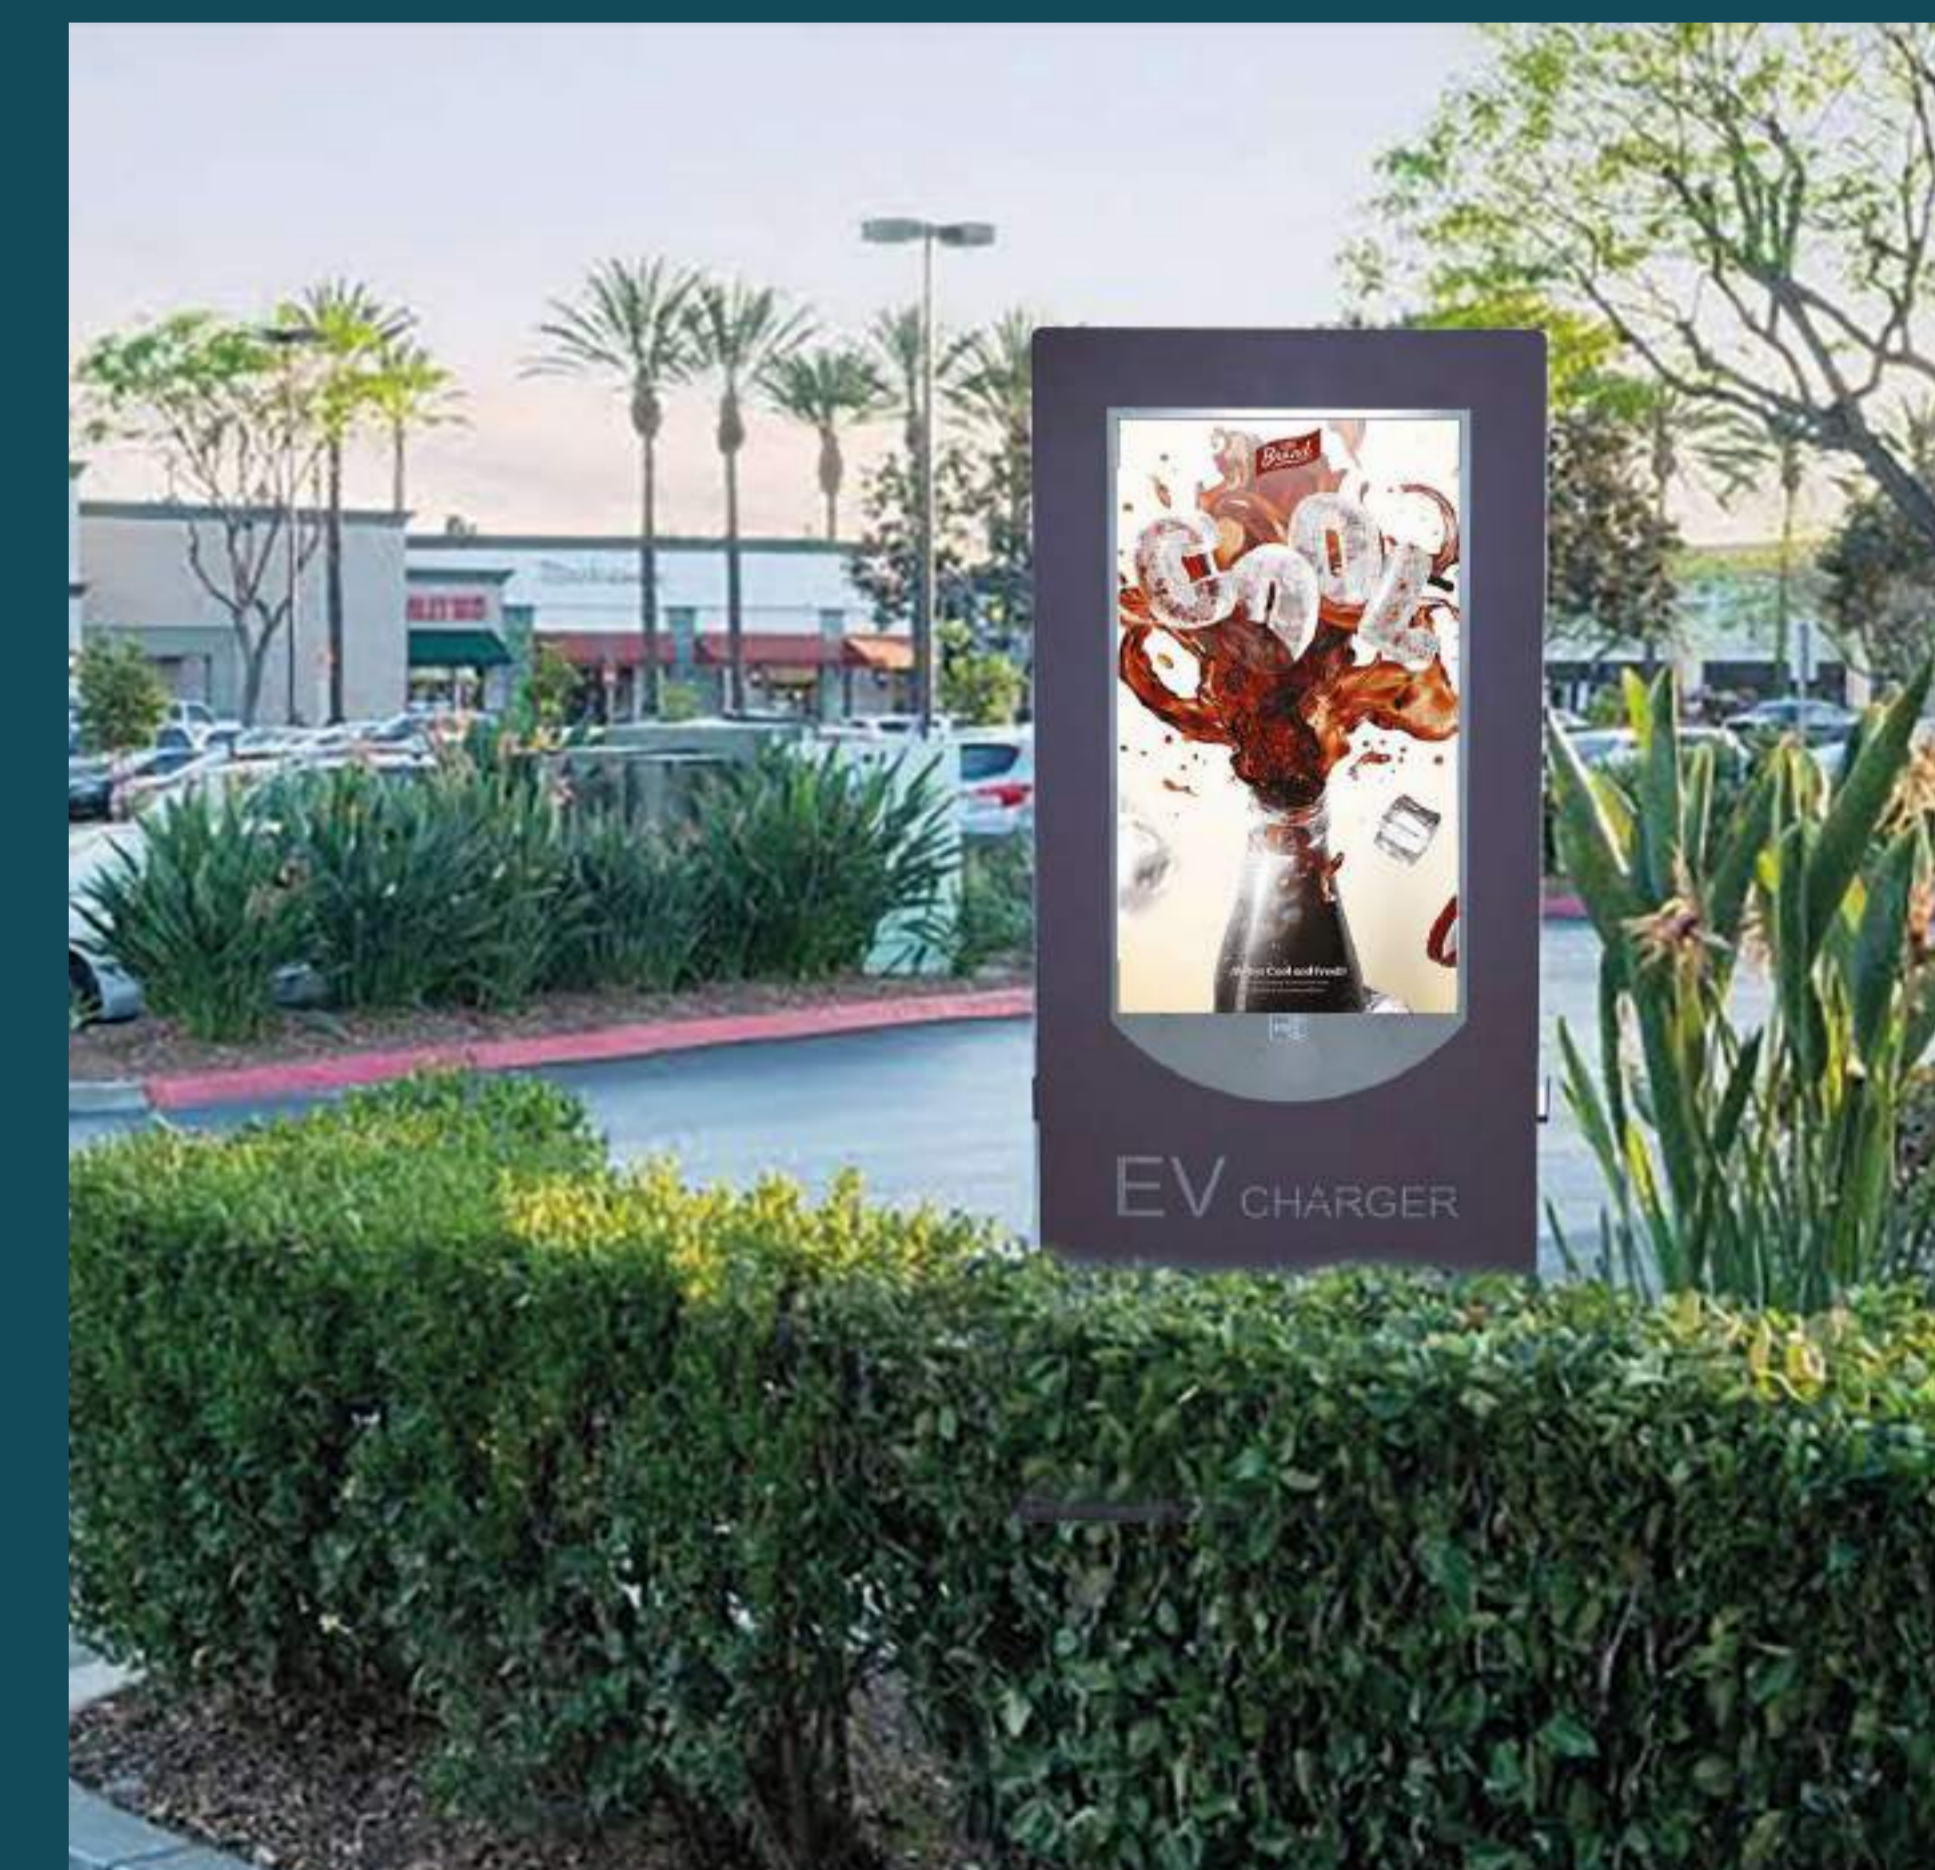

Sha7en offers a partnership to cater to the needs of its partners by sourcing top-of-the line chargers, handles civil and engineering work, provides easy-to-manage networking software, all with the aim of keeping the community fully charged.

FOR ADVERTISERS

EV charging stations with digital screens present an opportunity for brands to grow and succeed.

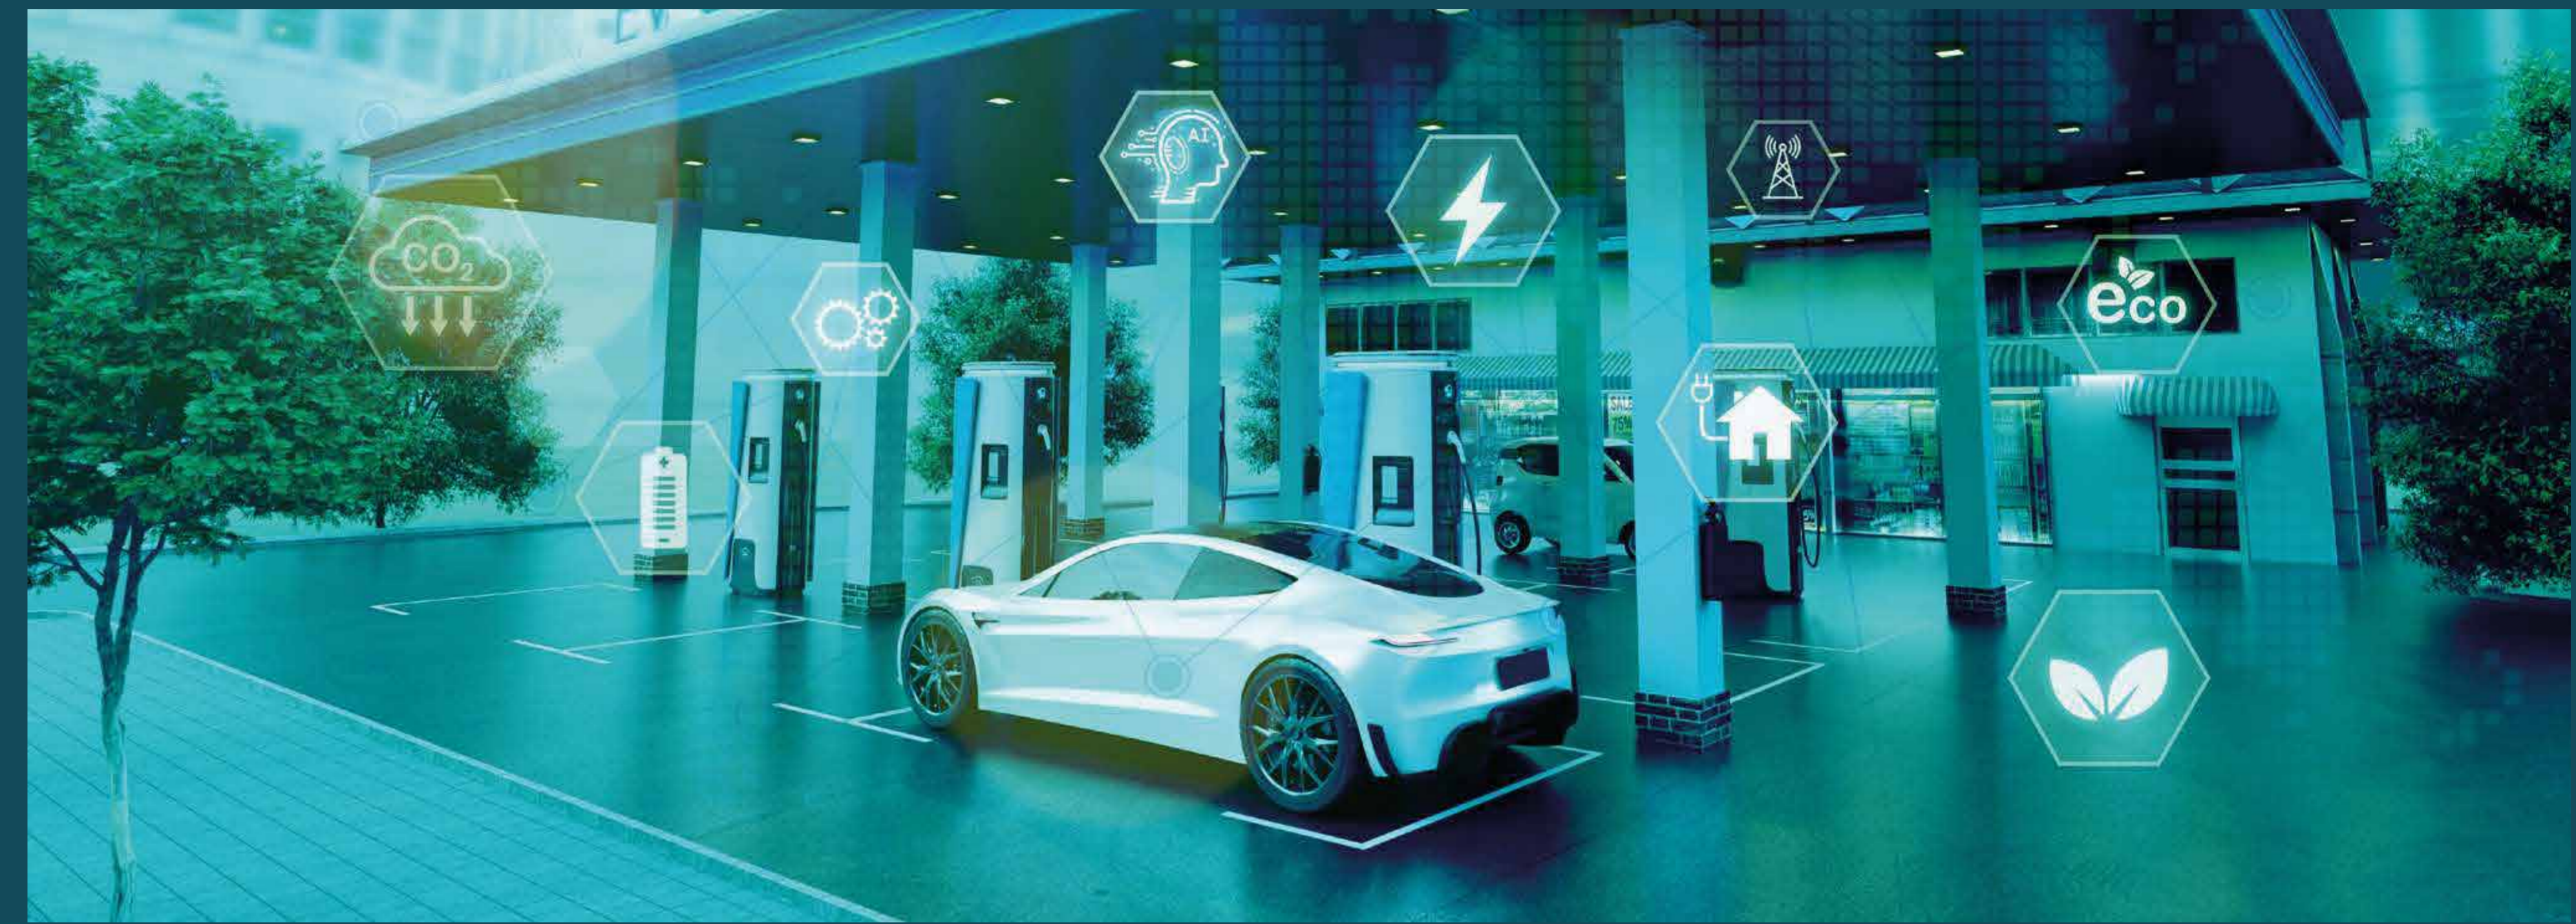

Sha7en stations are strategically situated in high traffic locations that maximize advertising exposure to shoppers at key moments when they may be more inclined to make a purchase decision.

Cloud based high-quality eye-catching screens deliver targeted advertising messages reaching many consumers as they go in their daily life with products and services aligned with their value.

EMPOWERING BUSINESSES AND COMMUNITIES WITH OUR EV INNOVATIVE SOLUTIONS

As a reliable trustworthy Partner, Sha7en is committed to deliver professional charging solutions:

FOR RESIDENTIAL

As the world changes, the demand for EV charge points will rapidly increase and more residents will look for a solution at home.

FOR BUSINESSES

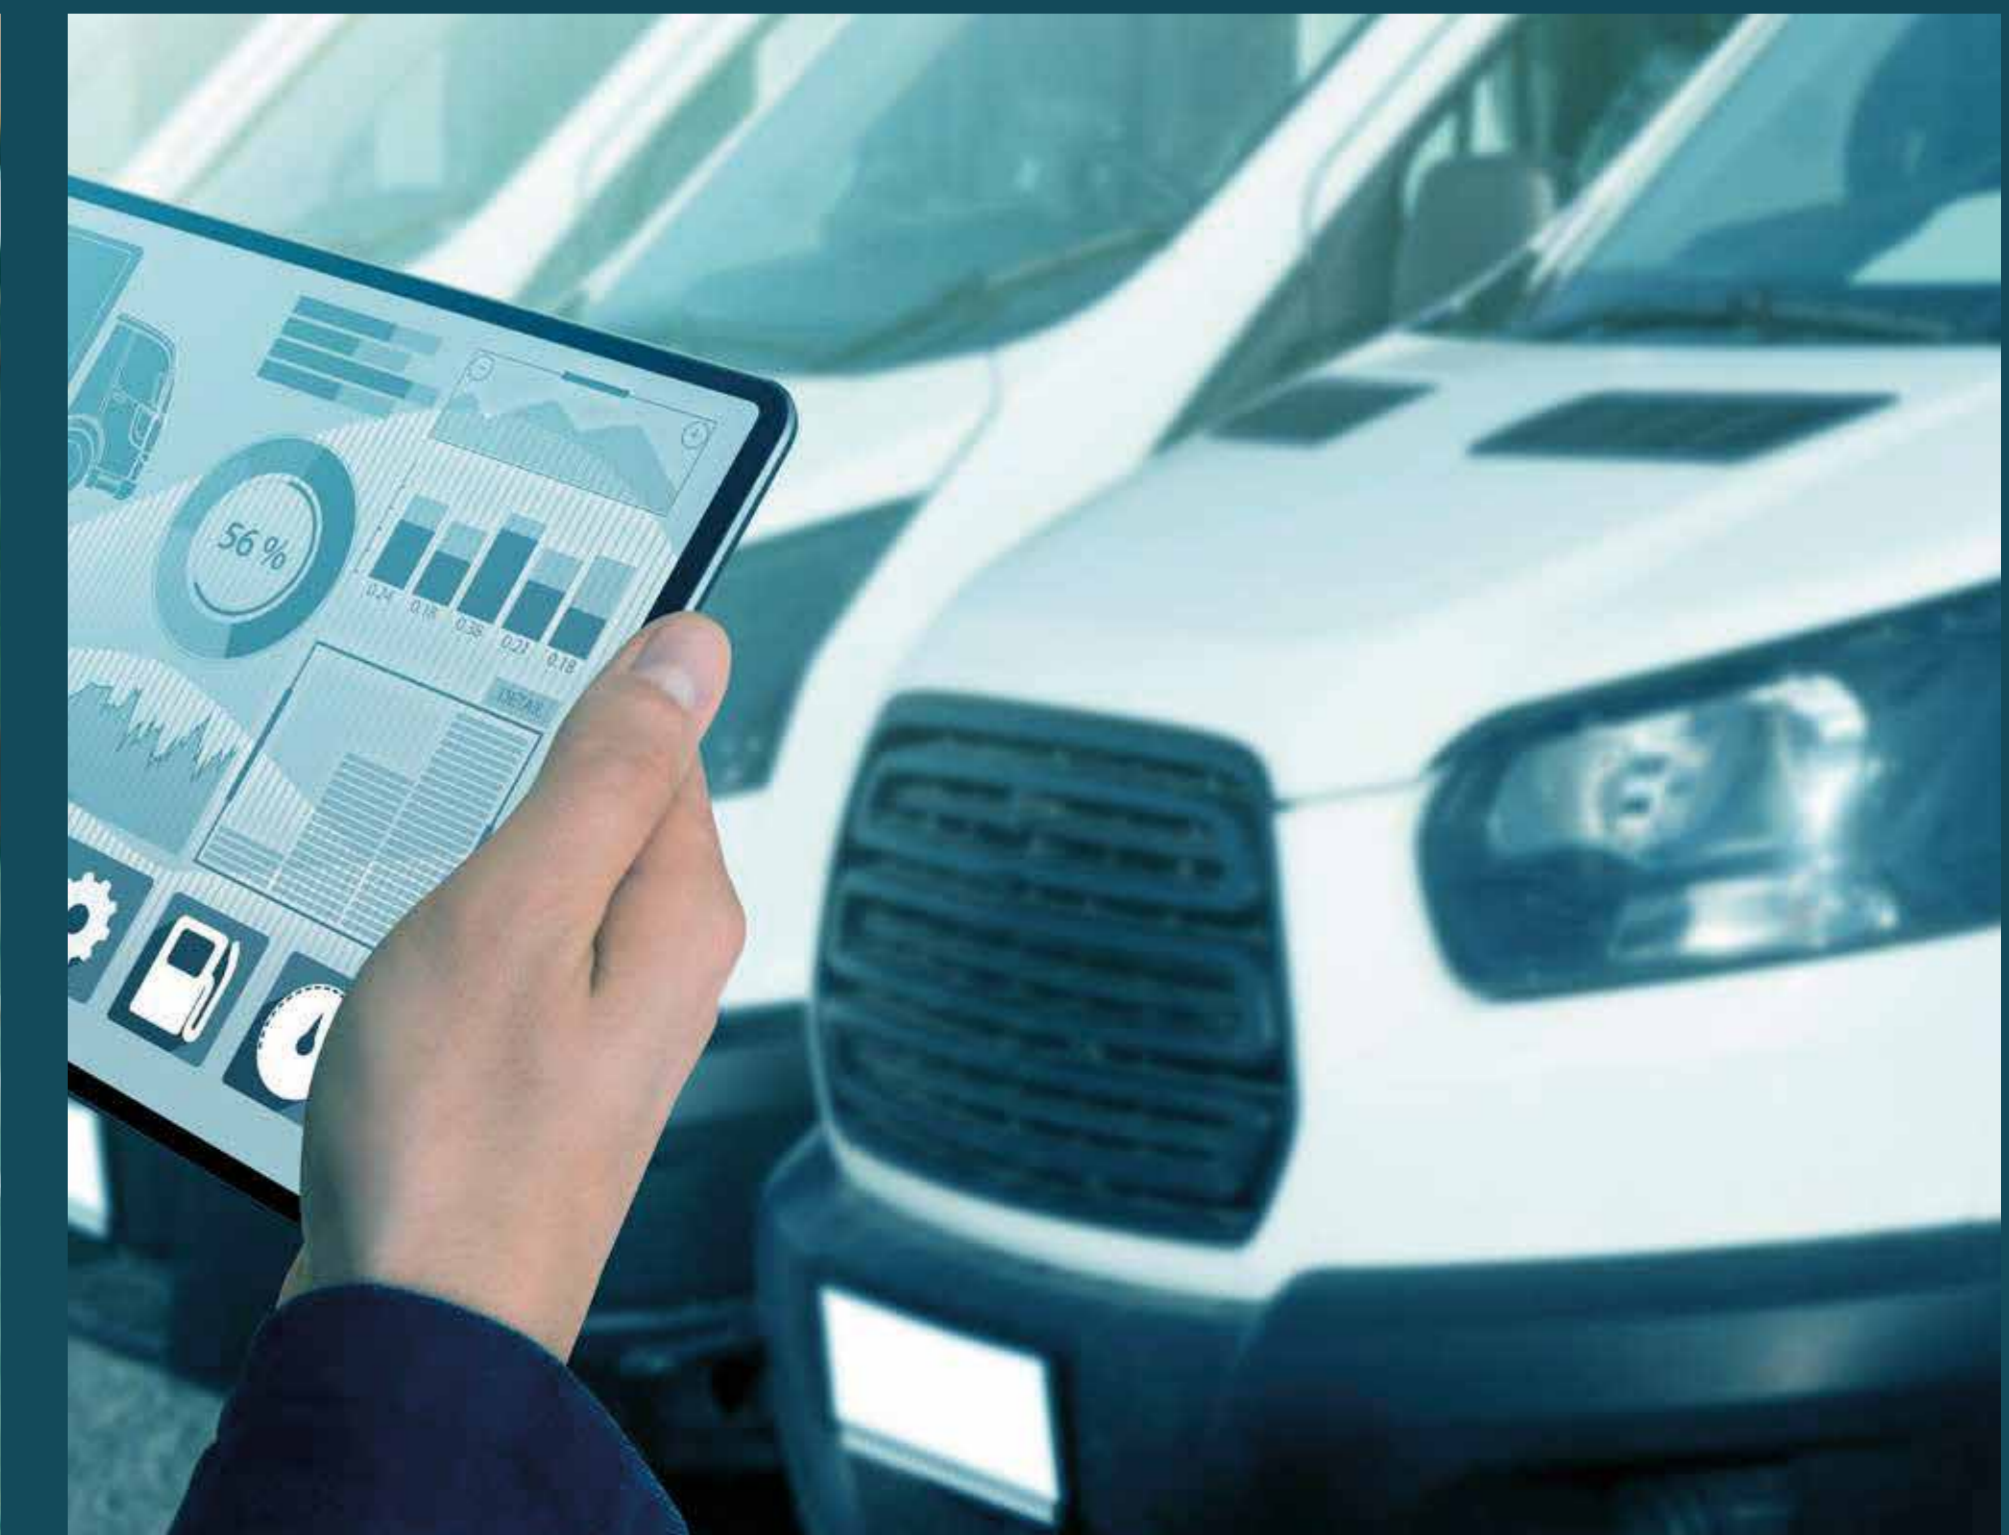

Not everyone can charge at home, so offering EV charges at work can be another great benefit that improves employee satisfaction.

FOR RETAIL OR HOSPITALITY

90% of EV drivers will seek out destinations that have charge points over those that do not. Installing electric chargers can grow business's visibility and increase valuable foot-traffic.

FOR FLEET MANAGEMENT

Migration will require bespoke solutions for fleet control that gives the ability to charge, control, monitor, and optimize their fleet quickly and easily from one interface.

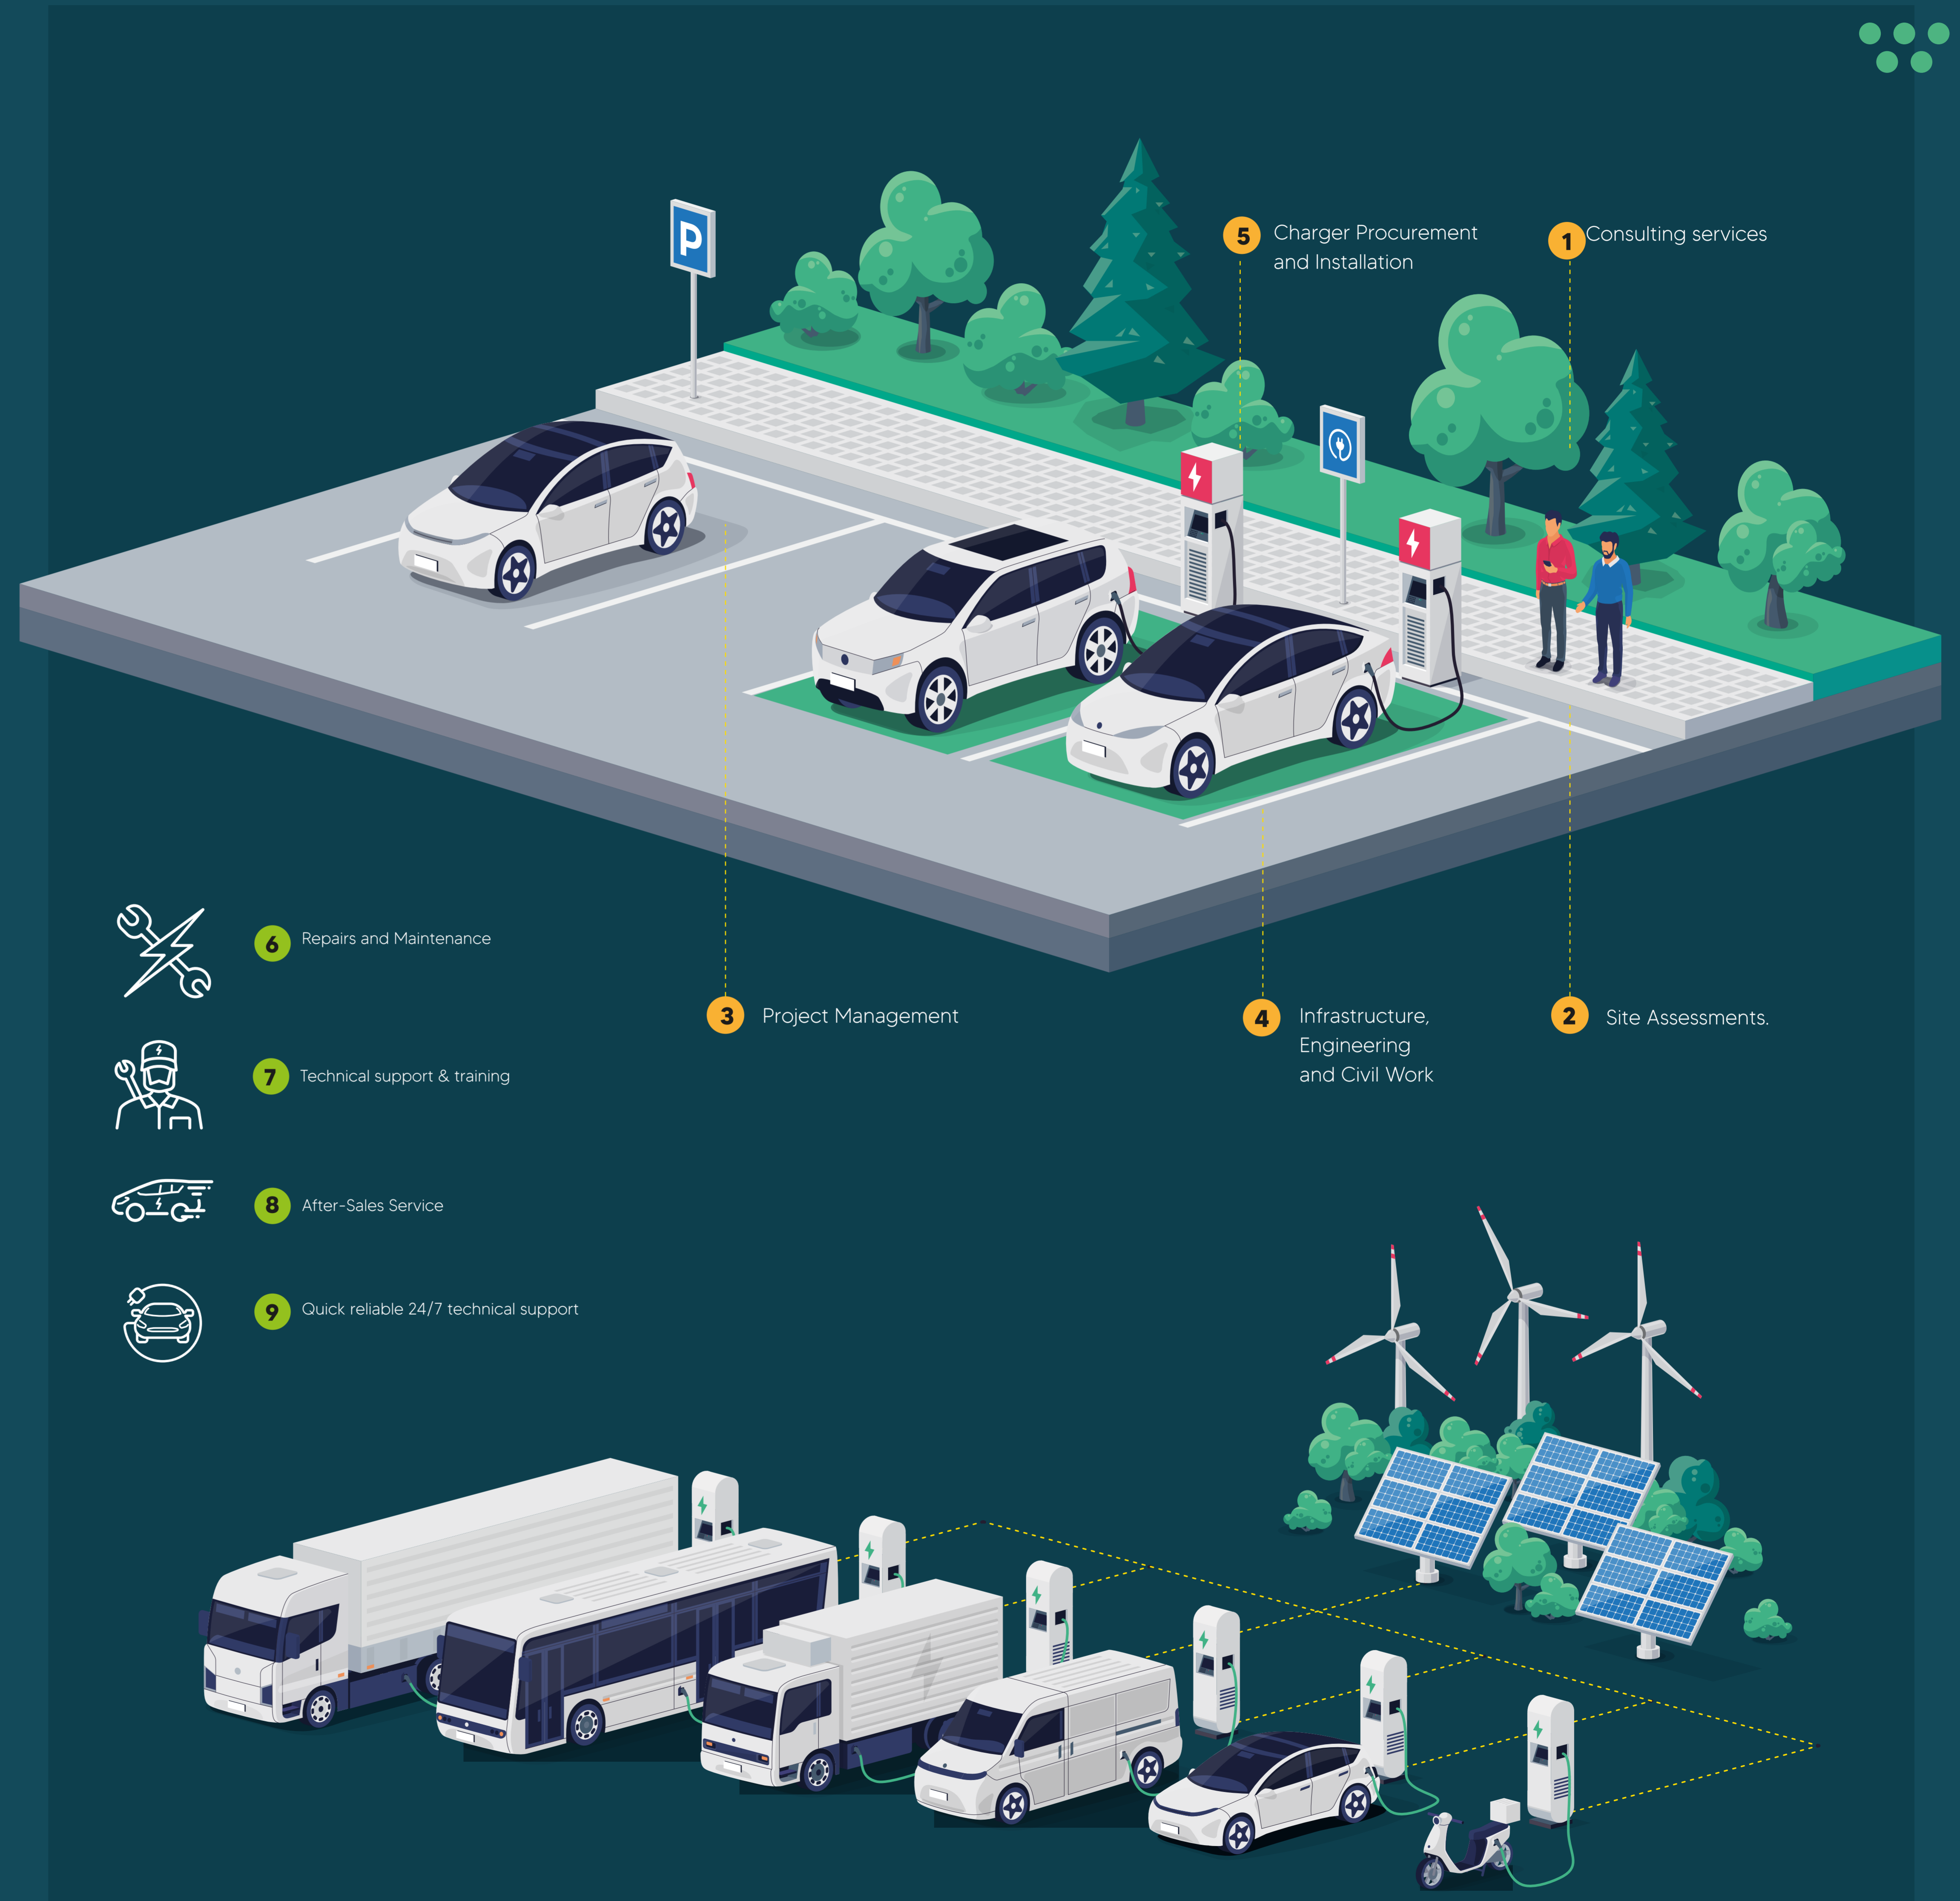

SHA7EN CUSTOMIZED SERVICES MADE TO YOUR SPECIFICATIONS

Whether you are looking for bespoke solutions or turnkey charging services for cars, trucks, trains, buses, scooters & golf carts, Sha7en offers customized charge solutions that cater to your business needs. Sha7en offers consultation on compliance issues, design and engineering requirements as part of a feasibility analysis to determine whether the project is logistically and economically viable.
